

PREVENT CHEATING DURING ONLINE EXAMS

With LockDown Browser and Respondus Monitor, I have peace of mind that the right person is taking the test. It works exceptionally well with our LMS, and gives me the flexibility and control I need for online tests.

Derrick Griffey, Gadsden State Community College

LockDown Browser

LockDown Browser® is a custom browser that locks down a computer or iPad to prevent cheating during online exams. It's ideal for use in proctored environments.

- Prevents access to other applications and websites during an exam
- Exam content cannot be copied or printed
- Students are locked into the exam until it is submitted for grading

Respondus Monitor

Respondus Monitor® is a companion product to LockDown Browser. It adds webcam and video technology to deter cheating and ensure student identity in non-proctored environments.

- Students use their own computer and webcam
- Real-time feedback helps to keep students within the video frame during exams
- Suspicious behaviors are automatically flagged and prioritized for review

GET STARTED TODAY

- ✓ **Easy to Use:** The instructor settings for LockDown Browser and Respondus Monitor appear within the online course. If the exam will require students to use LockDown Browser, simply select that setting. If the exam can be taken in a non-proctored setting, add the webcam setting.
- ✓ **Flexible:** Instructors can give students the choice of using Respondus Monitor to take the exam from a non-proctored setting (eg. home or work computer), or from a proctored location where only LockDown Browser is required. Students like the flexibility.
- ✓ **Convenient:** Students don't need to schedule exams in advance when using Respondus Monitor. The system is available 24/7.
- ✓ **No Per-Exam Fees:** Instructors can use LockDown Browser and Respondus Monitor with as many exams as they like in a course. There are no additional costs or per-exam fees.
