

Picking the math courses that fast-track you towards your goals?

It's as easy as 1-2-3.

Fire Science or Emergency Management MATH PATHS

If your goal is to enter the workforce in the Emergency Management/Homeland Security or Fire Science/Emergency Medical Technician associate degree program, you'll start with one of the following courses:

If you're interested in a career or transfer program in **FIRE SCIENCE** or **EMERGENCY MANAGEMENT**, the charts to the right show you which classes to take to begin your path.

For a full list of math requirements for the program you are in, please make sure to reference the college catalog.

About Math 0095

All CCRI students are required to take the ACCUPLACER placement test before registering for classes. If the test shows that you need to strengthen your math skills, you'll need to enroll in MATH 0095, our "Developmental Math Emporium."

The **Math Emporium** at CCRI is a new and innovative classroom model where students can master developmental math topics needed for credit bearing courses. Using ALEKS, an artificially intelligent assessment and learning system, and individual, on demand, one-on-one instruction from faculty members, students will have the opportunity to complete all of their developmental course work in one semester.
