

NEAS Standard Eight Meeting Notes

January 9, 2012

The committee focused on creating a brief summary that identifies priority areas needing improvement within CCRI's current practices/programs associated with Standard Eight.

Based upon the findings of the first two NEASC group meetings as well as the discussion that took place during individual standard's meetings in December, specific goals and objectives were outlined.

Very practical, tangible steps that Standard Eight can take within the next 12-18 months were developed. The presentation identifies and recommends a locus of responsibility for taking the next steps.

The listing of Standard Eight items clearly describe how the departments can have a very positive effect on the college's mission and goals and will be sent to Donna Mesoletta for her inclusion in a larger document for the overall committee.
