

Yoshi Rivas Johnson

Candidate for President

What makes you the best candidate for Student Government Vice President to represent all CCRI students?

I will not be able to say I am the best as I do not know the other candidates, but I do know I will give it my all. I think I would be great because I am very social and I do like to participate in the clubs and events that take place at school. With that reasoning, I would say I'm pretty involved and I have a good understanding of what could improve.

What leadership roles have you been apart of and how would your experiences aid in leading the Student Government team?

Drum major for band, vice president for orchestra, co captain of tennis, lead recruiter for my choir (it was a position they added which was to help get more choir people). My experiences could aid the student government because I always try to actively look for problems and search for solutions. To add to that, I have been in high stress situations so I am accustomed to situations that may be very challenging. I would always survey my classmates/teammates as I do not know everything and other point of views can help.

How do you plan on executing Student Government's mission throughout your vice presidency, if chosen? Give examples of ideas you'd like to put forward.

I plan to execute student government's mission by including the student body more. I want to conduct anonymous surveys so people can speak freely on any issues and not feel pressured to speak directly to people about it if they are uncomfortable. I also would like to make a closet where you can make an appointment that is filled with donations so people can get what they need at no cost. I think it could be a great help to many students as some work full time to support themselves and others. I also want to find a way to help people find their dream career path. If possible, I'd want one week long workshops of different careers that teach you valuable life skills pertaining to that degree.
