Starfish@CCRI
Connect for Success

CCRI and I care about your success! Starfish, CCRI's new student success software, is an online communication system that we will use over the semester to communicate about your attendance, course grades or academic performance.

ALL students need help in college, but sometimes it is difficult to know who or what to ask. Starfish provides you with a central place to connect to the people and services that can help you be successful in this course and with your CCRI experience.

Frequently check your CCRI email and the Starfish portal and consider taking any recommended actions. You can also schedule office hours with me directly through Starfish.

Log-in to MyCCRI. Click on **"For Students"**. Under the **"Registration Tools"** section, click on **Starfish** to access your Starfish Success Network.
